

NetRecipe

NetRecipe is a powerful web-based tool you can use to

- scale any recipe to any yield!
- access the entire Recipe Database
- copy and edit national menu templates easily AND create and save menu templates for an individual operating company
- display full nutritional data:
 - easy-to-read nutrition label
 - pie chart shows percent calories from protein, carbohydrate, and fat
- perform nutrient analysis
- print nutrition labels
- print all recipes for a meal at a single stroke!

CBORD's NetRecipe delivers convenience and flexibility to the kitchen. Scale recipes, print nutrition labels, and more!

NetRecipe makes it easier

The NetRecipe pie chart makes calorie information easy to grasp for those who want to know percentages of calories from protein, carbohydrates, and fat. The ingredients list adds value, too, especially for people with allergies or other food restrictions. Finally, the easy-to-read nutrition label is in familiar USDA format. Display the printed labels in dining areas as an added service to your customers!
